

Introducing the **FUSION 16** wheel

A perfect combination of performance, durability and style.

Every aspect of the Fusion 16 wheel was designed, engineered and tested for superior strength and reliability. Components were optimized to reduce weight without compromising function.

The 16-spoke lacing pattern provides open access and functionality

Fusion 16 wheel - black hub

- 8 - Radial laced spokes increase side load integrity w/ camber
- 8 - Cross laced spokes increase wheel rotational integrity (stiffness)
- 12 gauge spokes – stronger than standard 14 gauge
Allows reduced spoke count and weight with increased strength
- Double wall black anodized rim – optimized for weight and strength

Hub Features

- Contoured hub cut-outs reduce weight
- Positive lock retention groove ensure spokes do not turn and wheels stay true

Wheel Specifications:

- Weight - 811 grams*
- 1/2" sealed cartridge bearings
- 1.87" bearing spacing
- Black or Silver Hub Finish  
- Standard 6-tab hand-ring compatibility

* 559 wheel without hand-ring and tire

Fusion 16 wheel - silver hub

Available in **24" (540mm)**
25" (559mm)
26" (590mm)
