

ROHO® AirLITE® CUSHION

ROHO has *improved* the AirLITE with you in mind!

- Lower anterior height for improved transfers
- Same great positioning, with even deeper leg troughs
- Built in protection in a non-adjustable positioning cushion
- Softer, more comfortable foam...

...All at a reduced cost!

STABILITY WITH SAFETY COMBINED

The AirLITE Cushion improves the ability to transfer by lowering the front and middle of the cushion 3/4 inch (2 cm), while keeping its strong positioning capability by deepening the leg troughs. The lower height also contributes to a greater feeling of security in the chair.

“BOTTOM-OUT” PROTECTION

The non-adjustable ROHO AIR FLOATATION™ air insert built into the cushion under the ischials has been enhanced to provide better bottom-out protection.

SOFTER FOAM

Softer foam allows the cushion to conform to the individual's physiology and provide a more comfortable seating surface.

DURABILITY AND SIMPLICITY

The 24 month warranty shows our confidence in the quality and durability of the product. The AirLITE is an off the shelf, ready to use product. No adjustment is required.

HEAVY DUTY COVER

The cover design, with full zipper coverage, provides enhanced fluid resistance to protect the foam. At the same time, the cover is 100% PVC free, reinforcing ROHO's commitment to more environmentally friendly products.

AirLITE's design and technology provides the comfort individuals want and the support they need.

ROHO

ROHO® AirLITE® CUSHION
